**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

** Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
[a] Classification combined since errors may exist in the distinction between imports reported for them. (See "Imports of Blown Glassware," January 1953 issue of FTSN.)
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates. [1]Country of Shipment (Country of Origin Unknown)

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informel entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

REPORT NO. FT 110

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedure.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (not shown in this report, but published in FT 120 and FT 950).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity group totals (shown at the end of each commodity group in this report).
6. The commodity subgroup totals (included in this report for the first time effective January 1954 in order that users may have ready access, as more fully explained below, to available information on the undercounting in the individual Schedule A classifications in each subgroup resulting from the changed compiling procedure).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by Customs District, etc.

E. The Extent of Undercounting in the Schedule A Commodity Totals and Commodity by Country Statistics in this Report Resulting from Omission of Imports $250 or Less.

Since the monthly total for shipments individually valued $250 or less is in the neighborhood of $8 million ($4 million on informal and $4 million on formal entries) and represents only about 1 percent of the value of all imports, the undercounting for all detailed figures taken as a whole is not great, but it is possible that a high degree of undercounting in individual detailed figures may result. The smallest commodity breakdown of the estimated information on shipments valued $250 or less, published monthly, is on a subgroup basis. This amount estimated for each subgroup is one indication of the magnitude of the undercounting in the sum of the individual Schedule A classifications in that subgroup. In order that users of the data in Report No. FT 110 may have ready access to this distribution of the $8 million on a subgroup basis, and in order to call attention to the fact that the detailed statistics represent information on shipments over $250 only, subgroup total information has been inserted in the report immediately preceding the data for the first Schedule A commodity number in each subgroup as illustrated:

COMMODITY DESCRIPTION AND UNIT OF QUANTITY SCHEDULE A NUMBER		
COUNTRY OF ORIGIN	NET QUANTITY	VALUE (DOLLARS)
MEAT PRODUCTS		
TOTAL		12,836,891
SAMPLE 41**		67,020
OVER 250		12,769,871
OVER 250 DATA SHOWN BELOW		
BEEF BONE IN FRESH CHLD FROZN		LB
0018300	694,308	198,924
CANADA	241,977	69,781
DOM REP	359,773	104,327
AUSTRAL	87,655	22,247
OTH CTY	4,903	2,569

The value of $12,836,891 shown for TOTAL, immediately below the commodity subgroup description MEAT PRODUCTS is the subgroup total, made up of the fully compiled shipments valued over $250 ($12,769,871) for the subgroup, plus the estimated value for shipments valued at $250 or less ($67,020).

The value of $67,020 shown for SAMPLE is the amount which is estimated, on the basis of the sample, to have been imported in shipments valued at $250 or less for the subgroup. The figure 41 identified by a double asterisk (**) immediately after the word SAMPLE indicates that there were 41 shipments for the subgroup in

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

the sample. The use of number of shipments in sample to obtain a measure of the reliability of the estimate of the shipments $250 or less, and of the subgroup total which includes it, is explained in paragraph F below.

The value of $12,769,871 shown on the same line with OVER 250 is the total for the subgroup of the fully compiled data for shipments valued at over $250. This total is made up of the detailed statistics in the report shown on a Schedule A commodity by country of origin basis under the heading OVER 250 DATA SHOWN BELOW.

With allowances for sampling variability in the estimates, a measure of which can be obtained as explained in paragraph F below, the undercounting in a particular commodity or commodity by country figure, or any combination thereof within a commodity subgroup, would not be exptected to be greater than the total amount of the low-value estimate for the subgroup shown on the line labeled SAMPLE. In many instances this measure will tend to greatly overstate the limits of the undercounting. The user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total of low-value shipments for the subgroup among the detailed items which appear or which might have appeared for the subgroup in the report. In those cases where no data labeled SAMPLE appear for the subgroup, it can be known that no low-value items for the subgroup appeared in the sample, but this does not necessarilly mean that no low-value shipments were made for the subgroup. Similarly, the absence of a Schedule A commodity from the report, or the absence of a country name for a commodity, indicates that there were no imports over $250, but does not necessarily mean that no imports $250 or less were made.

An additional indication of the undercounting on a seven-digit Schedule A commodity basis without regard to country, during calendar year 1954, may be obtained from the Appendix to the calendar year 1954 issue of Report No. FT 110.

When considering the undercounting in January 1954 or subsequent months' detailed figures for purposes of evaluating its effect on comparisons with corresponding figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanation of any sampling procedures used are also included in the issues of Report No. FT 110 for the individual months of 1953. In summary, informal entries were excluded from all import statistics for 1953, and imports on formal entries under $100 were excluded from the detailed figures for the months January - December 1953.

F. The Accuracy of the Sample Estimates of Imports Individually Valued $250 or Less.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated commodity subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in this report, the number in the sample on which the estimate was based is given.

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is	Then the chances are better than 2 out of 3 that a complete tabulation whould have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimated increased by
0	0	[2]$2,200
1	$1,600	4,400
2	2,500	5,100
3	3,200	5,600
4	3,700	6,100
5	4,200	6,500
6	4,600	6,900
7 or 8	5,400	7,600
9 or 10	6,000	8,100
11 - 14	6,800	8,800
15 - 19	7,600	9,600
20 - 29	9,100	10,900
30 - 39	10,800	12,600
40 - 49	12,400	14,200
50 - 64	14,200	16,000
65 - 79	16,000	17,800
80 - 99	17,900	19,700
100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,800
175 - 199	26,200	28,000
200 - 249	29,000	30,800
250 - 299	32,000	33,800
300 - 399	37,000	39,000
400 - 499[3]	41,900	43,600

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup total is the fully compiled figure for imports $250 or more, shown separately for each subgroup in this report, plus 1/20 of the estimated amount shown for $1 to $250 imports.

[2] Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

The illustration given in section E above shows an estimated value of $67,020 based on 41 shipments in the sample. Referring to the line "40-49" in the above table, one notes the values $12,400 and $14,200. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $54,620 ($67,020 reduced by $12,400) and $81,220 ($67,020 increased by $14,200). Similarly, the subgroup total of $12,836,891 in the illustration in section E, which represent a combination of the total of $12,769,871 for the fully compiled data for shipments valued at over $250 plus the estimated value of $67,020 based on 41 shipments in the sample would be between $12,824,491 ($12,836,891 reduced by $12,400) and $12,851,091 ($12,836,891 increased by $14,200).

In the event a user desires to combine two or more commodity subgroup figures which are estimated values or include estimated values the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

G. The Effect of the Changes in Procedure on the Commodity Subgroup, Commodity Group and Over-all Totals.

The over-all import total has been increased by approximately $4 million per month by the inclusion of informal entries. Some indication of the distribution of this increase by commodity subgroup and commodity group is presented in the February 1954 issue of the *Notes*. Users interested in this information for particular commodities may make inquiry of the Bureau as to the information available.

These totals are all further affected by the fact that they now include estimates, and are therefore subject to sampling variability. A statistical meaaure of the sampling variability can be obtained in all cases by the method described in paragraph F above. However, the variability in the over-all total and in the commodity group totals is expected to be insignificant. The effect of sampling on the reliability of the commodity subgroup totals is less than 5 percent for all but a few of the commodity subgroup figures. The few exceptions are commodity subgroup figures with relatively small (under $200,000) totals.

A further effect of the changes in procedure on the summary figures is that inclusion of the entire estimated amounts for formal entry import items valued at $250 or less in the commodity subgroup and the commodity group totals in which they belong, effective January 1954, may affect, to a relatively minor extent, the comparability of these totals with the corresponding totals for the period July through December 1953. During the period July through December 1953 estimates of formal entry items valued at less than $100 were included in the total for commodity group 9 "Miscellaneous" and were excluded from the subgroup and group totals as well as from the commodity and commodity by country data.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also available for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Commodity information is reported according to the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, and is presented in the order of the numbered classifications in that Schedule. The Table of Contents on page 7 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular subgroups and commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $250.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported by the importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped before it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information"). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail identified as "OTH CTY" (other countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification. etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

TABLE OF CONTENTS

Description	Schedule A Commodity Code No.	Page No.
GROUP 00 - ANIMALS AND ANIMAL PRODUCTS, EDIBLE		
Animals, edible (except for breeding)	0010600-0015500	8
Meat products	0018300-0035500	8
Animal oils and fats, edible	0036000-0036900	8
Dairy products	0037000-0046990	8
Fish and fish products, except shellfish	0047000-0079590	8

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. Those estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. 0th Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**"Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - Includes countries from which imports are less than 10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. 0th Cty - includes countries from which imports are less than 10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

JULY 1955

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page ¶ for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

BUREAU OF THE CENSUS LIBRARY

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**"Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

[2] Classification combined since errors may exist in the distinction between imports reported for them. (See "Imports of Blown Glassware," January 1953 issue of FTSN.)

*Imports from each country are less than $10,000. Oth Cty = includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informel entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summery totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double esterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**"Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. 0th Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates. [1]Country of Shipment - (Country of Origin Unknown.)

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

REPORT NO. FT 110

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistmcs prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decreaae in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statiatics, information on immediate consumption imports individually valued $250 or less reported cn *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistica.

C. Reasons for Changea and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Eatimating Procedure.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (not shown in this report, but published in FT 120 and FT 950).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity group totals (shown at the end of each commodity group in this report).
6. The commodity subgroup totals (included in this report for the first time effective January 1954 in order that uaers may have ready access, as more fully explained below, to available information on the undercounting in the individual Schedule A classifications in each subgroup resulting from the changed compiling procedure).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics forcross-classifications such as commodity by country, country by Customs District, etc.

E. The Extent of Undercounting in the Schedule A Commodity Totala and Commodity by Country Statistics in this Report Resulting from Omiasion of Imports $250 or Less.

Since the monthly total for shipments individually valued $250 or lesa is in the neighborhood of $8 million ($4 million on informal and $4 million on formal entries) and repreaents only about 1 percent of the value of all imports, the undercounting for all detailed figures taken as a whole ia not great, but it is possible that a high degree of undercounting in individual detailed figures may result. The smallest commodity breakdown of the estimated information on shipments valued $250 or less, published monthly, is on a subgroup basis. This amount estimated for each subgroup is one indication of the magnitude of the undercounting in the sum of the individual Schedule A classifications in that subgroup. In order that users of the data in Report No. FT 110 may have ready access to this distribution of the $8 million on a subgroup basis, and in order tc call attention to the fact that the detailed statistics represent information on shipments over $250 only, subgroup total information has been inserted in the report immediately preceding the data for the first Schedule A commodity number in each subgroup as illustrated:

COMMODITY DESCRIPTION AND UNIT OF QUANTITY
SCHEDULE A NUMBER

COUNTRY OF ORIGIN	NET QUANTITY	VALUE (DOLLARS)
MEAT PRODUCTS		
TOTAL		12,836,891
SAMPLE 41**		67,020
OVER 250		12,769,871
OVER 250 DATA SHOWN BELOW		
BEEF BONE IN FRESH CHLD FROZN		LB
0018300	694,308	198,924
CANADA	241,977	69,781
DOM REP	359,773	104,327
AUSTRAL	87,655	22,247
OTH CTY	4,903	2,569

The value of $12,836,891 shown for TOTAL, immediately below the commodity subgroup description MEAT PRODUCTS is the subgroup total, made up of the fully compiled shipmenta valued over $250 ($12,769,871) for the subgroup, plus the estimated value for shipments valued at $250 or less ($67,020).

The value of $67,020 shown for SAMPLE is the amount which is estimated, on the basis of the sample, to have been imported in shipments valued at $250 or less for the subgroup. The figure 41 identified by a double asterisk (**) immediately after the word SAMPLE indicates that there were 41 shipments for the subgroup in

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

the sample. The use of number of shipments in sample to obtain a measure of the reliability of the estimate of the shipments $250 or less, and of the subgroup total which includes it, is explained in paragraph F below.

The value of $12,769,871 shown on the same line with OVER 250 is the total for the subgroup of the fully compiled data for shipments valued at over $250. This total is made up of the detailed statistics in the report shown on a Schedule A commodity by country of origin basis under the heading OVER 250 DATA SHOWN BELOW.

With allowances for sampling variability in the estimates, a measure of which can be obtained as explained in paragraph F below, the undercounting in a particular commodity or commodity by country figure, or any combination thereof within a commodity subgroup, would not be exptected to be greater than the total amount of the low-value estimate for the subgroup shown on the line labeled SAMPLE. In many instances this measure will tend to greatly overstate the limits of the undercounting. The user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total of low-value shipments for the subgroup among the detailed items which appear or which might have appeared for the subgroup in the report. In those cases where no data labeled SAMPLE appear for the subgroup, it can be known that no low-value items for the subgroup appeared in the sample, but this does not necessarily mean that no low-value shipments were made for the subgroup. Similarly, the absence of a Schedule A commodity from the report, or the absence of a country name for a commodity, indicates that there were no imports over $250, but does not necessarily mean that no imports $250 or less were made.

An additional indication of the undercounting on a seven-digit Schedule A commodity basis without regard to country, during calendar year 1954, may be obtained from the Appendix to the calendar year 1954 issue of Report No. FT 110.

When considering the undercounting in January 1954 or subsequent months' detailed figures for purposes of evaluating its effect on comparisons with corresponding figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanation of any sampling procedures used are also included in the issues of Report No. FT 110 for the individual months of 1953. In summary, informal entries were excluded from all import statistics for 1953, and imports on formal entries under $100 were excluded from the detailed figures for the months January - December 1953.

F. The Accuracy of the Sample Estimates of Imports Individually Valued $250 or Less.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated commodity subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in this report, the number in the sample on which the estimate was based is given.

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between

100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,800
175 - 199	26,200	28,000
200 - 249	29,000	30,800
250 - 299	32,000	33,800
300 - 399	37,000	39,000
400 - 499[3]	41,900	43,600

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup total is the fully compiled figure for imports $250 or more, shown separately for each subgroup in this report, plus 1/20 of the estimated amount shown for $1 to $250 imports.

[2] Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

The illustration given in section E above shows an estimated value of $67,020 based on 41 shipments in the sample. Referring to the line "40-49" in the above table, one notes the values $12,400 and $14,200. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $54,620 ($67,020 reduced by $12,400) and $81,220 ($67,020 increased by $14,200). Similarly, the subgroup total of $12,836,891 in the illustration in section E, which represent a combination of the total of $12,769,871 for the fully compiled data for shipments valued at over $250 plus the estimated value of $67,020 based on 41 shipments in the sample would be between $12,824,491 ($12,836,891 reduced by $12,400) and $12,851,091 ($12,836,891 increased by $14,200).

In the event a user desires to combine two or more commodity subgroup figures which are estimated values or include estimated values the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

G. The Effect of the Changes in Procedure on the Commodity Subgroup, Commodity Group and Over-all Totals.

The over-all import total has been increased by approximately $4 million per month by the inclusion of informal entries. Some indication of the distribution of this increase by commodity subgroup and commodity group is presented in the February 1954 issue of the *Notes*. Users interested in this information for particular commodities may make inquiry of the Bureau as to the information available.

These totals are all further affected by the fact that they now include estimates, and are therefore subject to sampling variability. A statistical measure of the sampling variability can be obtained in all cases by the method described in paragraph F above. However, the variability in the over-all total and in the commodity group totals is expected to be insignificant. The effect of sampling on the reliability of the commodity subgroup totals is less than 5 percent for all but a few of the commodity subgroup figures. The few exceptions are commodity subgroup figures with relatively small (under $200,000) totals.

A further effect of the changes in procedure on the summary figures is that inclusion of the entire estimated amounts for formal entry import items valued at $250 or less in the commodity subgroup and the commodity group totals in which they belong, effective January 1954, may affect, to a relatively minor extent, the comparability of these totals with the corresponding totals for the period July through December 1953. During the period July through December 1953 estimates of formal entry items valued at less than $100 were included in the total for commodity group 9 "Miscellaneous" and were excluded from the subgroup and group totals as well as from the commodity and commodity by country data.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also available for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Commodity information is reported according to the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, and is presented in the order of the numbered classifications in that Schedule. The Table of Contents on page 7 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular subgroups and commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $250.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported by the importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped before it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information"). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail identified as "OTH CTY" (other countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification. etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

TABLE OF CONTENTS

Description	Schedule A Commodity Code No.	Page No.
GROUP 00 - ANIMALS AND ANIMAL PRODUCTS, EDIBLE		
Animals, edible (except for breeding)	0010600-0015500	8
Meat products	0018300-0035500	8
Animal oils and fats, edible	0036000-0036900	8
Dairy products	0037000-0046990	8
Fish and fish products, except shellfish	0047000-0079590	8
Shellfish and products	0080100-0087900	9
Other edible animal products	0088100-0097900	9
GROUP 0 - ANIMALS AND ANIMAL PRODUCTS, INEDIBLE		
Hides and skins, raw (except furs)	0201000-0299900	10
Leather	0300100-0345900	10
Leather, rawhide, and parchment manufactures	0350300-0699990	11
Furs and manufactures	0701000-0759900	12
Animal and fish oils, fats, and greases, inedible	0803000-0821600	12
Other inedible animals and animal products	0840000-0990290	12
GROUP 1 - VEGETABLE FOOD PRODUCTS AND BEVERAGES		
Grains and preparations	1020000-1090260	13
Fodders and feeds, n.e.s	1101000-1190800	13
Vegetables and preparations	1191100-1250990	13
Fruits and preparations	1290000-1330990	14
Nuts and preparations	1350000-1380140	14
Vegetable oils and fats, edible	1420000-1428900	15
Cocoa, coffee, and tea	1501300-1521000	15
Spices	1523100-1550590	15
Sugar and related products	1570000-1654800	15
Beverages	1711300-1900000	16
GROUP 2 - VEGETABLE PRODUCTS, INEDIBLE, EXCEPT FIBERS AND WOOD		
Rubber and allied gums and manufactures	2011000-2098900	16
Gums, resins, and balsams, n.e.s	2102000-2189400	17
Drugs, herbs, leaves, roots, etc	2201000-2220490	17
Oil seeds	2231000-2240700	17
Vegetable oils and vegetable waxes	2241000-2290590	17
Dyeing and tanning materials	2302000-2345950	18
Seeds, except oil seeds	2401000-2460990	18
Nursery and greenhouse stock	2501000-2599100	18
Tobacco and manufactures	2601000-2629900	18
Miscellaneous vegetable products	2800000-2960150	19
GROUP 3 - TEXTILE FIBERS AND MANUFACTURES		
Cotton unmanufactured	3001010-3005000	19
Cotton semimanufactures	3006150-3020999	19
Cotton manufactures	3030000-3230800	19
Jute and manufactures	3241000-3250900	20
Flax, hemp, and ramie, and manufactures	3261000-3390590	20
Other vegetable fibers and manufactures	3401000-3421990	21
Wool, unmanufactured	3501000-3541000	21
Wool semimanufactures	3550000-3574600	21
Wool manufactures	3607000-3680800	23
Hair and manufactures, n.e.s	3690000-3698900	24
Silk, unmanufactured	3702000-3704200	24
Silk manufactures	3705100-3799900	24
Manufactures of rayon or other Man-made (synthetic) textile	3800000-3880490	25
Miscellaneous textile products	3900300-3981100	25
GROUP 4 - WOOD AND PAPER		
Wood, unmanufactured	4007100-4080500	27
Sawmill products (lumber)	4103100-4207555	27
Wood manufactures	4208000-4280990	27

UNITS OF QUANTITY

[The following is a list of the abbreviations for units of quantity used in this report. When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth, unbleached," and "Manganese ore," Schedule A Commodity Numbers 3040 001-3047 999 and 6211 000 respectively.)]

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**"Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labalad "SANPLE" are estimatas of informal antry and formal antry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double estarisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. 0th Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 20,000. Oth Cty - includes countries from which imports are less than 20,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

AUGUST 1955

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labelad "SAMPLE" are estimatas of informal entry and formal entry shipments valued $1-250 for the subgroup. Thase astimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

""Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 1D,000. Oth Cty - includes countries from which imports are less than 1D,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth.Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates. ¹Country of Shipment - (Country of Origin Unknown)

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**"Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import deta on lins labeled "SAMPLE" are estimates of informel entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity end commodity by country statistics, but are included in summary totals. See explanetion on page 4 for further information end use of number of shipments in sample (shown at left of double esterisk) to determine reliebility of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for ths subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. 0th Cty - includes countries from which inports are less than $10,000.

REPORT NO. FT 110

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedure.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (not shown in this report, but published in FT 120 and FT 950).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity group totals (shown at the end of each commodity group in this report).
6. The commodity subgroup totals (included in this report for the first time effective January 1954 in order that users may have ready access, as more fully explained below, to available information on the undercounting in the individual Schedule A classifications in each subgroup resulting from the changed compiling procedure).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by Customs District, etc.

E. The Extent of Undercounting in the Schedule A Commodity Totals and Commodity by Country Statistics in this Report Resulting from Omission of Imports $250 or Less.

Since the monthly total for shipments individually valued $250 or less is in the neighborhood of $8 million ($4 million on informal and $4 million on formal entries) and represents only about 1 percent of the value of all imports, the undercounting for all detailed figures taken as a whole is not great, but it is possible that a high degree of undercounting in individual detailed figures may result. The smallest commodity breakdown of the estimated information on shipments valued $250 or less, published monthly, is on a subgroup basis. This amount estimated for each subgroup is one indication of the magnitude of the undercounting in the sum of the individual Schedule A classifications in that subgroup. In order that users of the data in Report No. FT 110 may have ready access to this distribution of the $8 million on a subgroup basis, and in order to call attention to the fact that the detailed statistics represent information on shipments over $250 only, subgroup total information has been inserted in the report immediately preceding the data for the first Schedule A commodity number in each subgroup as illustrated:

COMMODITY DESCRIPTION AND UNIT OF QUANTITY
SCHEDULE A NUMBER

COUNTRY OF ORIGIN	NET QUANTITY	VALUE (DOLLARS)
MEAT PRODUCTS		
TOTAL		12,836,891
SAMPLE 41**		67,020
OVER 250		12,769,871
OVER 250 DATA SHOWN BELOW		
BEEF BONE IN FRESH CHLD FROZN		LB
0018300	694,308	198,924
CANADA	241,977	69,781
DOM REP	359,773	104,327
AUSTRAL	87,655	22,247
OTH CTY	4,903	2,569

The value of $12,836,891 shown for TOTAL, immediately below the commodity subgroup description MEAT PRODUCTS is the subgroup total, made up of the fully compiled shipments valued over $250 ($12,769,871) for the subgroup, plus the estimated value for shipments valued at $250 or less ($67,020).

The value of $67,020 shown for SAMPLE is the amount which is estimated, on the basis of the sample, to have been imported in shipments valued at $250 or less for the subgroup. The figure 41 identified by a double asterisk (**) immediately after the word SAMPLE indicates that there were 41 shipments for the subgroup in

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

the sample. The use of number of shipments in sample to obtain a measure of the reliability of the estimate of the shipments $250 or less, and of the subgroup total which includes it, is explained in paragraph F below.

The value of $12,769,871 shown on the same line with OVER 250 is the total for the subgroup of the fully compiled data for shipments valued at over $250. This total is made up of the detailed statistics in the report shown on a Schedule A commodity by country of origin basis under the heading OVER 250 DATA SHOWN BELOW.

With allowances for sampling variability in the estimates, a measure of which can be obtained as explained in paragraph F below, the undercounting in a particular commodity or commodity by country figure, or any combination thereof within a commodity subgroup, would not be exptected to be greater than the total amount of the low-value estimate for the subgroup shown on the line labeled SAMPLE. In many instances this measure will tend to greatly overstate the limits of the undercounting. The user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total of low-value shipments for the subgroup among the detailed items which appear or which might have appeared for the subgroup in the report. In those cases where no data labeled SAMPLE appear for the subgroup, it can be known that no low-value items for the subgroup appeared in the sample, but this does not necessarily mean that no low-value shipments were made for the subgroup. Similarly, the absence of a Schedule A commodity from the report, or the absence of a country name for a commodity, indicates that there were no imports over $250, but does not necessarily mean that no imports $250 or less were made.

An additional indication of the undercounting on a seven-digit Schedule A commodity basis without regard to country, during calendar year 1954, may be obtained from the Appendix to the calendar year 1954 issue of Report No. FT 110.

When considering the undercounting in January 1954 or subsequent months' detailed figures for purposes of evaluating its effect on comparisons with corresponding figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanation of any sampling procedures used are also included in the issues of Report No. FT 110 for the individual months of 1953. In summary, informal entries were excluded from all import statistics for 1953, and imports on formal entries under $100 were excluded from the detailed figures for the months January - December 1953.

F. The Accuracy of the Sample Estimates of Imports Individually Valued $250 or Less.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated commodity subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in this report, the number in the sample on which the estimate was based is given.

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimated increased by
0	0	[2]$2,200
1	$1,600	4,400
2	2,500	5,100
3	3,200	5,600
4	3,700	6,100
5	4,200	6,500
6	4,600	6,900
7 or 8	5,400	7,600
9 or 10	6,000	8,100
11 - 14	6,300	8,800
15 - 19	7,600	9,500
20 - 29	9,100	10,900
30 - 39	10,800	12,600
40 - 49	12,400	14,200
50 - 64	14,200	16,000
65 - 79	16,000	17,800
80 - 99	17,900	19,700
100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,900
175 - 199	26,200	28,000
200 - 249	28,000	30,800
250 - 299	32,000	33,800
300 - 399	37,000	39,000
400 - 499[3]	41,900	43,600

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup total is the fully compiled figure for imports $250 or more, shown separately for each subgroup in this report, plus 1/20 of the estimated amount shown for $1 to $250 imports.

[2] Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

The illustration given in section E above shows an estimated value of $67,020 based on 41 shipments in the sample. Referring to the line "40-49" in the above table, one notes the values $12,400 and $14,200. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $54,620 ($67,020 reduced by $12,400) and $81,220 ($67,020 increased by $14,200). Similarly, the subgroup total of $12,836,891 in the illustration in section E, which represent a combination of the total of $12,769,871 for the fully compiled data for shipments valued at over $250 plus the estimated value of $67,020 based on 41 shipments in the sample would be between $12,824,491 ($12,836,891 reduced by $12,400) and $12,851,091 ($12,836,891 increased by $14,200).

In the event a user desires to combine two or more commodity subgroup figures which are estimated values or include estimated values the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

G. The Effect of the Changes in Procedure on the Commodity Subgroup, Commodity Group and Over-all Totals.

The over-all import total has been increased by approximately $4 million per month by the inclusion of informal entries. Some indication of the distribution of this increase by commodity subgroup and commodity group is presented in the February 1954 issue of the *Notes*. Users interested in this information for particular commodities may make inquiry of the Bureau as to the information available.

These totals are all further affected by the fact that they now include estimates, and are therefore subject to sampling variability. A statistical measure of the sampling variability can be obtained in all cases by the method described in paragraph F above. However, the variability in the over-all total and in the commodity group totals is expected to be insignificant. The effect of sampling on the reliability of the commodity subgroup totals is less than 5 percent for all but a few of the commodity subgroup figures. The few exceptions are commodity subgroup figures with relatively small (under $200,000) totals.

A further effect of the changes in procedure on the summary figures is that inclusion of the entire estimated amounts for formal entry import items valued at $250 or less in the commodity subgroup and the commodity group totals in which they belong, effective January 1954, may affect, to a relatively minor extent, the comparability of these totals with the corresponding totals for the period July through December 1953. During the period July through December 1953 estimates of formal entry items valued at less than $100 were included in the total for commodity group 9 "Miscellaneous" and were excluded from the subgroup and group totals as well as from the commodity and commodity by country data.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also available for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Commodity information is reported according to the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, and is presented in the order of the numbered classifications in that Schedule. The Table of Contents on page 7 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular subgroups and commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $250

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported by the importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped before it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information"). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail identified as "OTH CTY" (other countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification. etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

TABLE OF CONTENTS

Description	Schedule A Commodity Code No.	Page No.
GROUP 00 - ANIMALS AND ANIMAL PRODUCTS, EDIBLE		
Animals, edible (except for breeding)	0010600-0015500	8
Meat products	0018300-0035500	8
Animal oils and fats, edible	0036000-0036900	8
Dairy products	0037000-0046990	8
Fish and fish products, except shellfish	0047000-0079590	8
Shellfish and products	0080100-0087900	9
Other edible animal products	0088100-0097900	9
GROUP 0 - ANIMALS AND ANIMAL PRODUCTS, INEDIBLE		
Hidea and skins, raw (except furs)	0201000-0299900	10
Leather	0300100-0345900	10
Leather, rawhide, and parchment manufactures	0350300-0699990	11
Furs and manufacturea	0701000-0759900	11
Animal and fish oils, fats, and greases, inedible	0803000-0821600	12
Other inedible animals and animal products	0840000-0990290	12
GROUP 1 - VEGETABLE FOOD PRODUCTS AND BEVERAGES		
Grains and preparations	1020000-1090260	13
Fodders and feeds, n.e.s	1101000-1190800	13
Vegetables and preparations	1191100-1250990	13
Fruits and preparations	1290000-1330990	14
Nuts and preparations	1350000-1380140	14
Vegetable oils and fats, edible	1420000-1428900	14
Cocoa, coffee, and tea	1501300-1521000	15
Spices	1523100-1550590	15
Sugar and related products	1570000-1654800	15
Beverages	1711300-1900000	15
GROUP 2 - VEGETABLE PRODUCTS, INEDIBLE, EXCEPT FIBERS AND WOOD		
Rubber and allied gums and manufactures	2011000-2098900	16
Gums, resins, and balsams, n.e.s	2102000-2189400	16
Drugs, herbs, leaves, roots, etc	2201000-2220490	17
Oil seeds	2231000-2240700	17
Vegetable oils and vegetable waxes	2241000-2290590	17
Dyeing and tanning materials	2302000-2345950	18
Seeds, except oil aeeds	2401000-2460990	18
Nursery and greenhouse stock	2501000-2599100	18
Tobacco and manufactures	2601000-2629900	18
Miscellaneous vegetable products	2800000-2960150	18
GROUP 3 - TEXTILE FIBERS AND MANUFACTURES		
Cotton unmanufactured	3001010-3005000	19
Cotton semimanufactures	3006150-3020999	19
Cotton manufactures	3030000-3230800	19
Jute and manufactures	3241000-3250900	20
Flax, hemp, and ramie, and manufactures	3261000-3390590	20
Other vegetable fibers and manufactures	3401000-3421990	21
Wool, unmanufactured	3501000-3541000	21
Wool semimanufactures	3550000-3574600	22
Wool manufactures	3607000-3680800	22
Hair and manufactures, n.e.s	3690000-3698900	24
Silk, unmanufactured	3702000-3704200	24
Silk manufactures	3705100-3799900	24
Manufactures of rayon or other Man-made (synthetic) textile	3800000-3880490	25
Miscellaneous textile products	3900300-3981100	25
GROUP 4 - WOOD AND PAPER		
Wood, unmanufactured	4007100-4080500	27
Sawmill products (lumber)	4103100-4207555	27
Wood manufactures	4208000-4280990	27
Cork and manufactures	4300000-4321900	28
Paper base stocks	4590000-4692900	28
Paper and manufactures	4711000-4799990	28
GROUP 5 - NONMETALLIC MINERALS		
Coal and related fuels	5001000-5014300	29
Petroleum and products	5052100-5079100	29
Stone, lime, cement, gypsum, and gypsum products	5080250-5193900	29
Glass and glass products	5200400-5290900	30
Clay and clay products	5300000-5390700	31
Other nonmetallic minerals and manufacturea (except precious stones and imitations)	5391000-5930980	31
Precious and semiprecious stonea and imitations and industrial diamonds	5950000-5958200	32
GROUP 6 - METALS AND MANUFACTURES, EXCEPT MACHINERY AND VEHICLES		
Iron ore and concentrates	6001000-6001100	33
Iron and steel semimanufactures	6002000-6060300	33
Steel mill products—manufactures	6081020-6116100	33
Iron and steel advanced manufactures	6117000-6200990	34
Ferro-alloys, ores, and metals, n.e.s	6211000-6270900	35
Nonferrous metals, except precious	6301000-6790990	36
Precious metals, jewelry, and plated ware	6820000-6900550	38
GROUP 7 - MACHINERY AND VEHICLES		
Electrical machinery and apparatus	7063200-7100990	39
Enginea, turbines, and parts, n.e.s	7110000-7110700	39
Other machinery, except agricultural	7400200-7800990	39
Agricultural machinery and implements	7850000-7890190	40
Vehicles, except agricultural	7900100-7940290	40
GROUP 8 - CHEMICALS AND RELATED PRODUCTS		
Coal-tar products	8001000-8090900	41
Medicinal and pharmaceutical preparations	8102000-8150600	41
Industrial chemicals	8170040-8380982	41

*For change in Schedule A commodity classification and /or coverage, effective September 10, 1955, see last page of this report.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

**Import date on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

[3]For change in Schedule A commodity classification and/or coverage, effective September 10, 1955, see last page of this report.

• **"Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.**

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

• **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

* **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

. **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

[3]For change in Schedule A commodity classification and/or coverage, effective September 10, 1955, see last page of this report.

• **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

. **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

* "Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

* "Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

. **Import data on line labalad "SAMPLE" era astimatas of informal entry and formal antry shipments valuad $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for furthar information and use of number of shipments in sample (shown at left of double astarisk) to determine reliability of astimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

SEPTEMBER 1955

*Classification combined since errors may exist in the distinction between imports reported for them. (See "Imports of Blown Glassware", January 1953 issue of FTSN.)

xFor change in Schedule A commodity classification and/or coverage, effective September 10, 1955, see last page of this report.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

• **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

** Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**"Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

SEPTEMBER 1955

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

[3]For change in Schedule A commodity classification and/or coverage, effective September 10, 1955, see last page of this report.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

[3]For change in Schedule A commodity classification and/or coverage, effective September 10, 1955, see last page of this report.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**"Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

SEPTEMBER 1955

NEW COMMODITY CLASSIFICATIONS, EFFECTIVE SEPTEMBER 10, 1955, WHICH WILL APPEAR IN PUBLIC BULLETIN A-5, CHANGES IN SCHEDULE A, - STATISTICAL CLASSIFICATION OF COMMODITIES IMPORTED INTO THE UNITED STATES

New Schedule A classification description	New Schedule A commodity number
Meat products	
Prepared or preserved birds, n.e.p.f.	
Turkeys prepared by removal of the feathers, heads and all or part of the viscera, with or without removal of the feet, but not cooked or divided into portions (formerly part of 0026 700)	0026 300
Other prepared or preserved birds, (except chickens) (formerly part of 0026 700)	0026 900
Fish, not for human consumption	
Goldfish (formerly part of 0980 180)	0980 160
Aquarium fish, n.e.s. (formerly part of 0980 180)	0980 170
Vegetables and preparations	
Garlic, dehydrated, in any form (formerly part of 1249 900)	1249 000
Cotton manufactures	
Table damask and manufactures of (formerly 3082 400 and 3082 500)	3082 300
Towels	
Jacquard-figured, not terry-woven (formerly 3086 410 and 3086 420)	3086 400
Gloves and mittens, finished or unfinished, of fabric knit on warp-knitting machine (formerly 3090 500 and 3090 600)	3090 000
Wood manufactures, except furniture	
Woven or partly assembled material of rattan, bamboo, osier or willow, suitable for use in making porch or window blinds, curtains, screens, or shades (from 4225 900)	4225 600
Glassware	
Household articles	
Pressed, polished including fire polished ware (formerly 5278 150 and part of 5278 920)	5278 140
Blown or partly blown, cut, engraved valued $3 or more each (except engraved ornamental articles valued $8 each or over) (formerly 5278 250 and 5278 650)	5278 240
Commercially known as bubble glass if produced otherwise than by automatic machine (formerly 5278 310 and 5278 710)	5278 320
Plated or cased glass composed of two or more layers, etc.	
Containing 24% or more lead oxide (formerly 5278 830)	5278 520
Not containing 24% or more lead oxide (formerly 5278 890)	5278 540
Blown or partly blown, decorated or colored, n.e.s. (formerly 5278 220, 5278 620, 5278 390 and part of 5278 790)	5278 690
Other glass and glass articles (except household ware)	
Blown or partly blown decorated or colored (formerly part of 5278 790)	5278 780
Pressed glass, n.e.s. (formerly 5278 930 and part of 5278 920)	5278 840
Fiber glass and products, n.e.s. (formerly part of 5278 940)	5278 860
Other glass and manufactures of glass (except broken glass and glass waste) (formerly part of 5278 940)	5278 950

New Schedule A classification description	New Schedule A commodity number
China and porcelain ware	
Table and kitchen articles and utensils	
Containing 25% or more of calcined bone	
Plain white, not painted, colored, etc. (formerly 5350 127 and 5352 107)	5350 010
Decorated, colored, etc. (formerly 5350 207 and 5352 207)	5350 020
Not containing 25% or more of calcined bone	
Hotel and restaurant ware (formerly 5352 100 and 5352 200)	5350 030
Plates not over 6 5/8 inches in diameter and valued over 90 cents but not over $2.55 per dozen, or over 6 5/8 but not over 7 7/8 inches in diameter and valued over $1.35 but not over $3.45 per dozen or, over 7 7/8 but not over 9 1/8 inches in diameter and valued over $1.80 but not over $5 per dozen, or over 9 1/8 inches in diameter and valued over $2.70 but not over $6 per dozen; cups, valued over $1.35 but not over $4.45 per dozen; saucers, valued over 90 cents but not over $1.45 per dozen; and articles other than plates, cups, or saucers, valued over $4.50 but not over $11.50 per dozen articles (formerly part of 5350 150 and 5350 250)	5350 040
Not containing 25% or more of calcined bone - continued	
Plates, cups, saucers and other kitchen articles, plain white, or decorated valued over the maximum values specified above for like articles (formerly 5250 130 and 5350 240)	5350 050
Plates, cups, saucers, and other table and kitchen articles, plain white, or decorated not over the minimum values specified above for like articles (formerly part of 5350 150 and 5350 250)	5350 060
Sanitary ware, (formerly 5360 310, 5360 320)	5360 300
Ornaments, figures, clock cases, plaques, vases, and other decorative articles and industrial articles

REPORT NO. FT 110

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Stotistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedure.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (not shown in this report, but published in FT 120 and FT 950).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity group totals (shown at the end of each commodity group in this report).
6. The commodity subgroup totals (included in this report for the first time effective January 1954 in order that users may have ready access, as more fully explained below, to available information on the undercounting in the individual Schedule A classifications in each subgroup resulting from the changed compiling procedure).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by Customs District, etc.

E. The Extent of Undercounting in the Schedule A Commodity Totals and Commodity by Country Statistics in this Report Resulting from Omission of Imports $250 or Less.

Since the monthly total for shipments individually valued $250 or less is in the neighborhood of $8 million ($4 million on informal and $4 million on formal entries) and represents only about 1 percent of the value of all imports, the undercounting for all detailed figures taken as a whole is not great, but it is possible that a high degree of undercounting in individual detailed figures may result. The smallest commodity breakdown of the estimated information on shipments valued $250 or less, published monthly, is on a subgroup basis. This amount estimated for each subgroup is one indication of the magnitude of the undercounting in the sum of the individual Schedule A classifications in that subgroup. In order that users of the data in Report No. FT 110 may have ready access to this distribution of the $8 million on a subgroup basis, and in order to call attention to the fact that the detailed statistics represent information on shipments over $250 only, subgroup total information has been inserted in the report immediately preceding the data for the first Schedule A commodity number in each subgroup as illustrated:

COMMODITY DESCRIPTION AND UNIT OF QUANTITY
SCHEDULE A NUMBER

COUNTRY OF ORIGIN	NET QUANTITY	VALUE (DOLLARS)
MEAT PRODUCTS		
TOTAL		12,836,891
SAMPLE 41**		67,020
OVER 250		12,769,871
OVER 250 DATA SHOWN BELOW		
BEEF BONE IN FRESH CHLD FROZN		LB
0018300	694,308	198,924
CANADA	241,977	69,781
DOM REP	359,773	104,327
AUSTRAL	87,655	22,247
OTH CTY	4,903	2,569

The value of $12,836,891 shown for TOTAL, immediately below the commodity subgroup description MEAT PRODUCTS is the subgroup total, made up of the fully compiled shipments valued over $250 ($12,769,871) for the subgroup, plus the estimated value for shipments valued at $250 or less ($67,020).

The value of $67,020 shown for SAMPLE is the amount which is estimated, on the basis of the sample, to have been imported in shipments valued at $250 or less for the subgroup. The figure 41 identified by a double asterisk (**) immediately after the word SAMPLE indicates that there were 41 shipments for the subgroup in

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

the sample. The use of number of shipments in sample to obtain a measure of the reliability of the estimate of the shipments $250 or less, and of the subgroup total which includes it, is explained in paragraph F below.

The value of $12,769,871 shown on the same line with OVER 250 is the total for the subgroup of the fully compiled data for shipments valued at over $250. This total is made up of the detailed statistics in the report shown on a Schedule A commodity by country of origin basis under the heading OVER 250 DATA SHOWN BELOW.

With allowances for sampling variability in the estimates, a measure of which can be obtained as explained in paragraph F below, the undercounting in a particular commodity or commodity by country figure, or any combination thereof within a commodity subgroup, would not be exptected to be greater than the total amount of the low-value estimate for the subgroup shown on the line labeled SAMPLE. In many instances this measure will tend to greatly overstate the limits of the undercounting. The user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total of low-value shipments for the subgroup among the detailed items which appear or which might have appeared for the subgroup in the report. In those cases where no data labeled SAMPLE appear for the subgroup, it can be known that no low-value items for the subgroup appeared in the sample, but this does not necessarily mean that no low-value shipments were made for the subgroup. Similarly, the absence of a Schedule A commodity from the report, or the absence of a country name for a commodity, indicates that there were no imports over $250, but does not necessarily mean that no imports $250 or less were made.

An additional indication of the undercounting on a seven-digit Schedule A commodity basis without regard to country, during calendar year 1954, may be obtained from the Appendix to the calendar year 1954 issue of Report No. FT 110.

When considering the undercounting in January 1954 or subsequent months' detailed figures for purposes of evaluating its effect on comparisons with corresponding figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanation of any sampling procedures used are also included in the issues of Report No. FT 110 for the individual months of 1953. In summary, informal entries were excluded from all import statistics for 1953, and imports on formal entries under $100 were excluded from the detailed figures for the months January - December 1953.

F. The Accuracy of the Sample Estimates of Imports Individually Valued $250 or Less.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated commodity subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in this report, the number in the sample on which the estimate was based is given.

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is	Then the chances are better than 2 out of 3 that a complete tabulation whould have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimated increased by
0	0	[2]$2,200
1	$1,600	4,400
2	2,500	5,100
3	3,200	5,600
4	3,700	6,100
5	4,200	6,500
6	4,600	6,900
7 or 8	5,400	7,600
9 or 10	6,000	8,100
11 - 14	6,800	8,800
15 - 19	7,600	9,600
20 - 29	9,100	10,900
30 - 39	10,800	12,600
40 - 49	12,400	14,200
50 - 64	14,200	16,000
65 - 79	16,000	17,800
80 - 99	17,900	19,700
100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,900
175 - 199	26,200	28,000
200 - 249	29,000	30,800
250 - 299	32,000	33,900
300 - 399	37,000	39,000
400 - 499[3]	41,900	43,600

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup total is the fully compiled figure for imports $250 or more, shown separately for each subgroup in this report, plus 1/20 of the estimated amount shown for $1 to $250 imports.

[2] Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

The illustration given in section E above shows an estimated value of $67,020 based on 41 shipments in the sample. Referring to the line "40-49" in the above table, one notes the values $12,400 and $14,200. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $54,620 ($67,020 reduced by $12,400) and $81,220 ($67,020 increased by $14,200). Similarly, the subgroup total of $12,836,891 in the illustration in section E, which represent a combination of the total of $12,769,871 for the fully compiled data for shipments valued at over $250 plus the estimated value of $67,020 based on 41 shipments in the sample would be between $12,824,491 ($12,836,891 reduced by $12,400) and $12,851,091 ($12,836,891 increased by $14,200).

In the event a user desires to combine two or more commodity subgroup figures which are estimated values or include estimated values the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

G. The Effect of the Changes in Procedure on the Commodity Subgroup, Commodity Group and Over-all Totals.

The over-all import total has been increased by approximately $4 million per month by the inclusion of informal entries. Some indication of the distribution of this increase by commodity subgroup and commodity group is presented in the February 1954 issue of the *Notes*. Users interested in this information for particular commodities may make inquiry of the Bureau as to the information available.

These totals are all further affected by the fact that they now include estimates, and are therefore subject to sampling variability. A statistical measure of the sampling variability can be obtained in all cases by the method described in paragraph F above. However, the variability in the over-all total and in the commodity group totals is expected to be insignificant. The effect of sampling on the reliability of the commodity subgroup totals is less than 5 percent for all but a few of the commodity subgroup figures. The few exceptions are commodity subgroup figures with relatively small (under $200,000) totals.

A further effect of the changes in procedure on the summary figures is that inclusion of the entire estimated amounts for formal entry import items valued at $250 or less in the commodity subgroup and the commodity group totals in which they belong, effective January 1954, may affect, to a relatively minor extent, the comparability of these totals with the corresponding totals for the period July through December 1953. During the period July through December 1953 estimates of formal entry items valued at less than $100 were included in the total for commodity group 9 "Miscellaneous" and were excluded from the subgroup and group totals as well as from the commodity and commodity by country data.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also available for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Commodity information is reported according to the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, and is presented in the order of the numbered classifications in that Schedule. The Table of Contents on page 7 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular subgroups and commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $250.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported by the importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped before it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information"). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail identified as "OTH CTY" (other countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification. etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

TABLE OF CONTENTS

Description	Schedule A Commodity Code No.	Page No.
GROUP 00 - ANIMALS AND ANIMAL PRODUCTS, EDIBLE		
Animals, edible (except for breeding)	0010600-0015500	8
Meat products	0018300-0035500	8
Animal oils and fats, edible	0036000-0036900	8
Dairy products	0037000-0046990	8
Fish and fish products, except shellfish	0047000-0079590	8
Shellfish and products	0080100-0087900	9
Other edible animal products	0088100-0097900	9
GROUP 0 - ANIMALS AND ANIMAL PRODUCTS, INEDIBLE		
Hides and skins, raw (except furs)	0201000-0299900	10
Leather	0300100-0345900	10
Leather, rawhide, and parchment manufactures	0350300-0699990	11
Furs and manufactures	0701000-0759900	12
Animal and fish oils, fats, and greases, inedible	0803000-0821600	12
Other inedible animals and animal products	0840000-0990290	12
GROUP 1 - VEGETABLE FOOD PRODUCTS AND BEVERAGES		
Grains and preparations	1020000-1090260	13
Fodders and feeds, n.e.s	1101000-1190800	13
Vegetables and preparations	1191100-1250990	13
Fruits and preparations	1290000-1330990	14
Nuts and preparations	1350000-1380140	15
Vegetable oils and fats, edible	1420000-1428900	15
Cocoa, coffee, and tea	1501300-1521000	15
Spices	1523100-1550590	15
Sugar and related products	1570000-1654800	15
Beverages	1711300-1900000	16
GROUP 2 - VEGETABLE PRODUCTS, INEDIBLE, EXCEPT FIBERS AND WOOD		
Rubber and allied gums and manufactures	2011000-2098900	16
Gums, resins, and balsams, n.e.s	2102000-2189400	17
Drugs, herbs, leaves, roots, etc	2201000-2220490	17
Oil seeds	2231000-2240700	17
Vegetable oils and vegetable waxes	2241000-2290590	17
Dyeing and tanning materials	2302000-2345950	18
Seeds, except oil seeds	2401000-2460990	18
Nursery and greenhouse stock	2501000-2599100	18
Tobacco and manufactures	2601000-2629900	18
Miscellaneous vegetable products	2800000-2960150	19
GROUP 3 - TEXTILE FIBERS AND MANUFACTURES		
Cotton unmanufactured	3001010-3005000	19
Cotton semimanufactures	3006150-3020999	19
Cotton manufactures	3030000-3230800	19

* "Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. Those estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. 0th Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty = includes countries from which imports are less than $10,000.

**Import data on line labalad "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Qty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

** **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

. **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates. [1]Country of Shipment - (Country of Origin Unknown.)

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

. **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty = includes countries from which imports are less than $10,000.

** "Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

• **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

* **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
>Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

* "Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

* **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

OCTOBER 1955

* **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

oImports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

* "Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - Includes countries from which imports are less than 10,000.

. **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

OCTOBER 1955

* "Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - Includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

OCTOBER 1955

** Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labelad "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

* "Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

. **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

OCTOBER 1955

* **Import data on lins labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information end use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

•Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

, **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. Those estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

, **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty = Includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double esterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

. **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000. 1Country of Shipment - (Country of Origin Unknown)

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistmcs prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statiatics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedure.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (not shown in this report, but published in FT 120 and FT 950).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity group totals (shown at the end of each commodity group in this report).
6. The commodity subgroup totals (included in this report for the first time effective January 1954 in order that users may have ready access, as more fully explained below, to available information on the undercounting in the individual Schedule A classifications in each subgroup resulting from the changed compiling procedure).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by Customs District, etc.

E. The Extent of Undercounting in the Schedule A Commodity Totals and Commodity by Country Statistics in this Report Resulting from Omission of Imports $250 or Less.

Since the monthly total for shipments individually valued $250 or less is in the neighborhood of $8 million ($4 million on informal and $4 million on formal entries) and represents only about 1 percent of the value of all imports, the undercounting for all detailed figures taken as a whole is not great, but it is possible that a high degree of undercounting in individual detailed figures may result. The smallest commodity breakdown of the estimated information on shipments valued $250 or less, published monthly, is on a subgroup basis. This amount estimated for each subgroup is one indication of the magnitude of the undercounting in the sum of the individual Schedule A classifications in that subgroup. In order that users of the data in Report No. FT 110 may have ready access to this distribution of the $8 million on a subgroup basis, and in order to call attention to the fact that the detailed statistics represent information on shipments over $250 only, subgroup total information has been inserted in the report immediately preceding the data for the first Schedule A commodity number in each subgroup as illustrated:

COMMODITY DESCRIPTION AND UNIT OF QUANTITY SCHEDULE A NUMBER		
COUNTRY OF ORIGIN	NET QUANTITY	VALUE (DOLLARS)
MEAT PRODUCTS		
TOTAL		12,836,891
SAMPLE 41**		67,020
OVER 250		12,769,871
OVER 250 DATA SHOWN BELOW		
BEEF BONE IN FRESH CHLD FROZN		LB
0018300	694,308	198,924
CANADA	241,977	69,781
DOM REP	359,773	104,327
AUSTRAL	87,655	22,247
OTH CTY	4,803	2,569

The value of $12,836,891 shown for TOTAL, immediately below the commodity subgroup description MEAT PRODUCTS is the subgroup total, made up of the fully compiled shipments valued over $250 ($12,769,871) for the subgroup, plus the estimated value for shipments valued at $250 or less ($67,020).

The value of $67,020 shown for SAMPLE is the amount which is estimated, on the basis of the sample, to have been imported in shipments valued at $250 or less for the subgroup. The figure 41 identified by a double asterisk (**) immediately after the word SAMPLE indicates that there were 41 shipments for the subgroup in

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

the sample. The use of number of shipments in sample to obtain a measure of the reliability of the estimate of the shipments $250 or less, and of the subgroup total which includes it, is explained in paragraph F below.

The value of $12,769,871 shown on the same line with OVER 250 is the total for the subgroup of the fully compiled data for shipments valued at over $250. This total is made up of the detailed statistics in the report shown on a Schedule A commodity by country of origin basis under the heading OVER 250 DATA SHOWN BELOW.

With allowances for sampling varisbility in the estimates, a measure of which can be obtained as explained in paragraph F below, the undercounting in a particulsr commodity or commodity by country figure, or any combination thereof within a commodity subgroup, would not be exptected to be greater than the total amount of the low-value estimate for the subgroup shown on the line lsbeled SAMPLE. In many instsnces this measure will tend to greatly overstate the limits of the undercounting. The user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total of low-value shipments for the subgroup among the detailed items which appear or which might have appeared for the subgroup in the report. In those cases where no data labeled SAMPLE appear for the subgroup, it can be known that no low-value items for the subgroup appeared in the sample, but this does not necessarilly mean that no low-value shipments were made for the subgroup. Similarly, the absence of a Schedule A commodity from the report, or the absence of a country name for a commodity, indicates that there were no imports over $250, but does not necessarily mean that no imports $250 or less were made.

An additional indication of the undercounting on a seven-digit Schedule A commodity basis without regard to country, during calendar year 1954, may be obtained from the Appendix to the cslendar year 1954 issue of Report No. FT 110.

When considering the undercounting in January 1954 or subsequent months' detailed figures for purposes of evaluating its effect on comparisons with corresponding figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanation of any sampling procedures used are also included in the issues of Report No. FT 110 for the individual months of 1953. In summary, informal entries were excluded from all import statistics for 1953, and imports on formal entries under $100 were excluded from the detailed figures for the months Jansury - December 1953.

F. The Accuracy of the Sample Estimates of Imports Individually Valued $250 or Less.

When statistics are estimated on the bssis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated commodity subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimsted figure in this report, the number in the sample on which the estimate was based is given.

THE TABLE BELOW INDICATES THE OEGREE OF RELIABILITY TO BE ATTACHEO TO A SPECIFIEO VALUE:

If the number of shipments valued at $250 or less included in the sample, as indicated by the sample cerd count, is	Then the chances ere better than 2 out of 3 that a complete tabulation whould have resulted in a value figure between	
	The specified estimete reduced by[1]	And the specified estimated increased by
0	0	[2]$2,200
1	$1,600	4,400
2	2,500	5,100
3	3,200	5,600
4	3,700	6,100
5	4,200	6,500
6	4,600	6,900
7 or 8	5,400	7,600
9 or 10	6,000	8,100
11 - 14	6,800	3,800
15 - 19	7,600	9,600
20 - 29	9,100	10,900
30 - 39	10,800	12,600
40 - 49	12,400	14,200
50 - 64	14,200	16,000
65 - 79	16,000	17,800
80 - 99	17,900	19,700
100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,800
175 - 199	26,200	28,000
200 - 249	29,000	30,800
250 - 299	32,000	33,900
300 - 399	37,000	39,000
400 - 499[3]	41,900	43,600

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup total is the fully compiled figure for imports $250 or more, shown separately for each subgroup in this report, plus 1/20 of the estimated amount shown for $1 to $250 imports.

[2] Where commodities normelly are not imported, an indication of zero shipments in the sample is, of course, probably not underestimeted to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimetes of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimeted amounts for shipments valued $250 or less, combined, will generelly be less than 1 percent.

The illustration given in section E above shows an estimated value of $67,020 based on 41 shipments in the sample. Referring to the line "40-49" in the above table, one notes the values $12,400 and $14,200. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $54,620 ($67,020 reduced by $12,400) and $81,220 ($67,020 increased by $14,200). Similarly, the subgroup total of $12,836,891 in the illustration in section E, which represent a combination of the totsl of $12,769,871 for the fully compiled data for shipments valued at over $250 plus the estimated value of $67,020 based on 41 shipments in the sample would be between $12,824,491 ($12,836,891 reduced by $12,400) and $12,851,091 ($12,836,891 increased by $14,200).

In the event a user desires to combine two or more commodity subgroup figures which are estimated values or include estimated values the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

G. The Effect of the Changes in Procedure on the Commodity Subgroup, Commodity Group and Over-all Totals.

The over-all import total has been increased by approximately $4 million per month by the inclusion of informal entries. Some indication of the distribution of this increase by commodity subgroup and commodity group is presented in the February 1954 issue of the *Notes*. Users interested in this information for particular commodities may make inquiry of the Bureau as to the information available.

These totals are all further affected by the fact that they now include estimates, and are therefore subject to sampling variability. A statistical measure of the sampling variability can be obtained in all cases by the method described in paragraph F above. However, the variability in the over-all total and in the commodity group totals is expected to be insignificant. The effect of sampling on the reliability of the commodity subgroup totals is less than 5 percent for all but a few of the commodity subgroup figures. The few exceptions are commodity subgroup figures with relatively small (under $200,000) totals.

A further effect of the changes in procedure on the summary figures is that inclusion of the entire estimated amounts for formal entry import items valued at $250 or less in the commodity subgroup and the commodity group totals in which they belong, effective January 1954, may affect, to a relatively minor extent, the comparability of these totals with the corresponding totals for the period July through December 1953. During the period July through December 1953 estimates of formal entry items valued at less than $100 were included in the total for commodity group 9 "Miscellaneous" and were excluded from the subgroup and group totals as well as from the commodity and commodity by country data.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also available for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report. is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not aubject to an import duty based on value.) United States import duties are excluded.

COMMODITY INFORMATION

Commodity information is reported according to the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, and is presented in the order of the numbered classifications in that Schedule. The Table of Contents on page 7 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular subgroups and commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $250.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported by the importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped before it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information"). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail identified as "OTH CTY" (other countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current atatistics, unusual shipments, problems of valuation, classification. etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

UNITS OF QUANTITY

[The following is a list of the abbreviations for units of quantity used in this report. When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth, unbleached," and "Manganese ore," Schedule A Commodity Numbers 3040 001-3047 999 and 6211 000 respectively.)]

Abbrev.	Unit of Quantity	Abbrev.	Unit of Quantity	Abbrev.	Unit of Quantity	Abbrev.	Unit of Quantity
AOZ	Advoirdupois Ounce	DPC	Dozen Pieces	LF	Leaf	PK	Pack
BBL	Barrel	DPR	Dozen Pair	LFT	Linear Foot	PR	Pair
BFT	Board Foot	FT	Foot	LTN	Long Ton	RM	Ream
BU	Bushel	GAL	Gallon	M	Thousand	RSQ	Roof Square
BUN	Bunch	GBX	Gross Boxes	MBF	Thousand Board Feet	SFT	Square Foot
CAR	Carat	GLB	Pound (gross weight)	MCF	Thousand Cubic Feet	SQI	Square Inch
CD	Cord	GR	Gross	MFT	Thousand Feet	STN	Short Ton
CFT	Cubic Foot	GRL	Gross Lines	MG	Milligram	SUF	Superficial Foot
CLB	Pound (net content)	GTN	Ton (gross weight)	NO	Number	SYD	Square Yard
CRT	Crate	IN	Inch	PC	Piece	TOZ	Troy Ounce
CTN	Ton (net content)	LB	Pound	PFG	Proof Gallon	WSQ	Wall Square

. **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

. **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

* **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

* "Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

* "Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

1Country of Shipment - (Country of Origin Unknown).

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

NOVEMBER 1955

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
•Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.
*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

NOVEMBER 1955

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page (A) for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

* "Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

•Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

NOVEMBER 1955

• **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

. **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

** "Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

* **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty = includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

* **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $20,000. Oth Cty - includes countries from which imports are less than $20,000.

** Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

. **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

**Import date on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity end commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

. **Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedure.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (not shown in this report, but published in FT 120 and FT 950).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity group totals (shown at the end of each commodity group in this report).
6. The commodity subgroup totals (included in this report for the first time effective January 1954 in order that users may have ready access, as more fully explained below, to available information on the undercounting in the individual Schedule A classifications in each subgroup resulting from the changed compiling procedure).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by Customs District, etc.

E. The Extent of Undercounting in the Schedule A Commodity Totals and Commodity by Country Statistics in this Report Resulting from Omission of Imports $250 or Less.

Since the monthly total for shipments individually valued $250 or less is in the neighborhood of $8 million ($4 million on informal and $4 million on formal entries) and represents only about 1 percent of the value of all imports, the undercounting for all detailed figures taken as a whole is not great, but it is possible that a high degree of undercounting in individual detailed figures may result. The smallest commodity breakdown of the estimated information on shipments valued $250 or less, published monthly, is on a subgroup basis. This amount estimated for each subgroup is one indication of the magnitude of the undercounting in the sum of the individual Schedule A classifications in that subgroup. In order that users of the data in Report No. FT 110 may have ready access to this distribution of the $8 million on a subgroup basis, and in order to call attention to the fact that the detailed statistics represent information on shipments over $250 only, subgroup total information has been inserted in the report immediately preceding the data for the first Schedule A commodity number in each subgroup as illustrated:

The value of $12,836,891 shown for TOTAL, immediately below the commodity subgroup description MEAT PRODUCTS is the subgroup total, made up of the fully compiled shipments valued over $250 ($12,769,871) for the subgroup, plus the estimated value for shipments valued at $250 or less ($67,020).

The value of $67,020 shown for SAMPLE is the amount which is estimated, on the basis of the sample, to have been imported in shipments valued at $250 or less for the subgroup. The figure 41 identified by a double asterisk (**) immediately after the word SAMPLE indicates that there were 41 shipments for the subgroup in

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

the sample. The use of number of shipments in aample to obtain a measure of the reliability of the estimate of the shipments $250 or leas, and of the subgroup total which includes it, is explained in paragraph F below.

The value of $12,769,871 shown on the same line with OVER 250 is the total for the aubgroup of the fully compiled data for shipments valued at over $250. Thia total is made up of the detailed atatiatics in the report shown on a Schedule A commodity by country of origin basis under the heading OVER 250 DATA SHOWN BELOW.

With allowances for sampling variability in the estimates, a measure of which can be obtained as explained in paragraph F below, the undercounting in a particular commodity or commodity by country figure, or any combination thereof within a commodity subgroup, would not be exptected to be greater than the total amount of the low-value estimate for the subgroup shown on the line labeled SAMPLE. In many instances this meaaure will tend to greatly overstate the limits of the undercounting. The user's own knowledge of the usual pattern of shipmenta may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total of low-value shipments for the aubgroup among the detailed items which appear or which might have appeared for the subgroup in the report. In those casea where no data labeled SAMPLE appear for the subgroup, it can be known that no low-value items for the aubgroup appeared in the sample, but this does not necessarilly mean that no low-value shipments were made for the subgroup. Similarly, the abaence of a Schedule A commodity from the report, or the absence of a country name for a commodity, indicates that there were no imports over $250, but does not necesaarily mean that no imports $250 or less were made.

An additional indication of the undercounting on a seven-digit Schedule A commodity basis without regard to country, during calendar year 1954, may be obtained from the Appendix to the calendar year 1954 issue of Report No. FT 110.

When conaidering the undercounting in January 1954 or subsequent months' detailed figures for purposes of evaluating ita effect on comparisons with corresponding figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier months, as well aa the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* deacribea the coverage in effect for different perioda of 1953. Coverage atatements and explanation of any sampling procedures used are also included in the issues of Report No. FT 110 for the individual months of 1953. In summary, informal entries were excluded from all import statistics for 1953, and imports on formal entriea under $100 were excluded from the detailed figures for the months January - December 1953.

F. The Accuracy of the Sample Estimates of Imports Individually Valued $250 or Less.

When statistics are estimated on the basis of a sample, exact agreement with the resulta that would have been obtained from a complete tabulation is not expected. The extent to which the eatimated commodity subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value ahipmenta which fall in the sample. For each estimated figure in thia report, the number in the sample on which the estimate was based ia given.

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

If tha number of shipments velued at $250 or less included in the sampla, as indicated by tha sampla card count, is	Then the chances ere better than 2 out of 3 that a complete tabulation whould have resulted in a velua figure between	
	The specified astimate reduced by[1]	And the specified estimated increased by
0	0	[2]$2,200
1	$1,600	4,400
2	2,500	5,100
3	3,200	5,600
4	3,700	6,100
5	4,200	6,500
6	4,600	6,900
7 or 8	5,400	7,600
9 or 10	6,000	8,100
11 - 14	6,300	8,800
15 - 19	7,600	9,600
20 - 29	9,100	10,900
30 - 39	10,800	12,600
40 - 49	12,400	14,200
50 - 64	14,200	16,000
65 - 79	16,000	17,800
80 - 99	17,900	19,700
100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,800
175 - 199	26,200	28,000
200 - 249	29,000	30,800
250 - 299	32,000	33,800
300 - 399	37,000	39,000
400 - 499[3]	41,900	43,600

[1] The minimum velue for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of e perticuler low-value astimata by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this teble overstetes the amount by which complete tebulation could have reduced the velue. The minimum valua for any subgroup total is the fully compilad figure for imports $250 or more, shown saperately for aach subgroup in this report, plus 1/20 of tha estimeted amount shown for $1 to $250 imports.

[2] Whare commodities normally ara not imported, an indication of zero shipments in tha sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in tha sampla of $250 or lass is greater than 499, then (a) the sampling variability for tha estimates of the low-value shipments will generelly be less than 7 percent; and (b) the sampling variability for tha total of the fully compiled ovar $250 shipments and tha estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

The illustration given in section E above ahows an eatimated value of $67,020 based on 41 shipments in the sample. Referring to the line "40-49" in the above table, one notes the values $12,400 and $14,200. Thia means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $54,620 ($67,020 reduced by $12,400) and $81,220 ($67,020 increased by $14,200). Similarly, the aubgroup total of $12,836,891 in the illustration in aection E, which repreaent a combination of the total of $12,769,871 for the fully compiled data for shipments valued at over $250 plus the estimated value of $67,020 based on 41 ahipmenta in the sample would be between $12,824,491 ($12,836,891 reduced by $12,400) and $12,851,091 ($12,836,891 increased by $14,200).

In the event a user desires to combine two or more commodity subgroup figures which are estimated valuea or include estimated values the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined aample size.

G. **The Effeet of the Changes in Procedure on the Commodity Subgroup, Commodity Group and Over-all Totals.**

The over-all import total has been increaaed by approximately $4 million per month by the inclusion of informal entries. Some indication of the distribution of this increase by commodity aubgroup and commodity group is presented in the February 1954 issue of the *Notes*. Users interested in this information for particular commodities may make inquiry of the Bureau aa to the information available.

These totals are all further affected by the fact that they now include estimates, and are therefore subject to sampling variability. A statiatical measure of the sampling variability can be obtained in all cases by the method deacribed in paragraph F above. However, the variability in the over-all total and in the commodity group totals is expected to be inaignificant. The effect of sampling on the reliability of the commodity subgroup totals is leaa than 5 percent for all but a few of the commodity subgroup figures. The few exceptions are commodity aubgroup figures with relatively amall (under $200,000) totals.

A further effect of the changea in procedure on the summary figures is that incluaion of the entire estimated amounts for formal entry import items valued at $250 or leas in the commodity subgroup and the commodity group totals in which they belong, effective January 1954, may affect, to a relatively minor extent, the comparability of these totals with the correaponding totala for the period July through December 1953. During the period July through December 1953 estimatea of formal entry items valued at less than $100 were included in the total for commodity group 9 "Miscellaneoua" and were excluded from the subgroup andgroup totals aswell aa from the commodity and commodity by country data.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also available for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general importa of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statiatics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which ia not aubject to an import duty baaed on value.) United States import duties are excluded.

COMMODITY INFORMATION

Commodity information is reported according to the claasifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, and is preaented in the order of the numbered classifications in that Schedule. The Table of Contents on page 7 of this report indicatea the range of Schedule A commodity numbers covering related subgroups of commoditiea and will assist in locating in the report the statistics for particular subgroups and commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $250.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that country is the country of shipment instead of origin, the country is footnoted in this report. In addition, countries reported by the importer and included in the statistics as country of origin may actually represent shipment instead of origin for merchandise which is transshipped before it reaches the United States. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptiona of the countries, adjacent provincea, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information"). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail identified as "OTH CTY" (other countries), unless imports from no country amount to $10,000 or more. If imports of a commodity do not amount to $10,000 or more from any country, an asterisk is shown opposite the commodity total. Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current atatistics, unusual shipments, problems of valuation, classification. etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reporta on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulationa or the availability of special reports, request should be made to the Bureau of the Census.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. 0th Cty - includes countries from which imports are less than 10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Amounts from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**"Import data on line labeled "SANPLE" are estimates of informel entry and formal entry shipments velued $1-250 for the subgroup. These estimated emounts ere excluded from the commodity end commodity by country stetistics, but are included in summery totels. See explenetion on page 4 for further information and use of number of shipments in sample (shown at left of double esterisk) to determine reliebility of estimetes.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**"Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty = includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

DECEMBER 1955

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

DECEMBER 1955

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $20,000. Oth Cty - includes countries from which imports are less than $20,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates. [1]Country of Shipment - (Country of Origin Unknown.)

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on lines labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty = includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

DECEMBER 1955

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

**Import date on line labeled "SAMPLE" are estimates of informel entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipmants in sample (shown at left of double astarisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. 0th Cty - includes countries from which imports are less than 10,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than 10,000. Oth Cty - includes countries from which imports are less than 10,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $0,000. Oth Cty - includes countries from which imports are less than $0,000.

**Import data on line labeled "SAMPLE" are estimates of informal entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.

GRAND TOTAL		1006232672	

**Import date on line labeled "SAMPLE" are estimates of informel entry and formal entry shipments valued $1-250 for the subgroup. These estimated amounts are excluded from the commodity and commodity by country statistics, but are included in summary totals. See explanation on page 4 for further information and use of number of shipments in sample (shown at left of double asterisk) to determine reliability of estimates.

*Imports from each country are less than $10,000. Oth Cty - includes countries from which imports are less than $10,000.
